

INDIANA UNIVERSITY

**University Graduate School  
2008-2009  
Academic Bulletin**

**Special Opportunities**

**Foreign Language Instruction**

Indiana University offers instruction in a wide variety of foreign languages. Formal courses or tutorials have been offered in recent years on the Bloomington campus in the following:

Albanian  
Akan  
American Sign Language  
Arabic  
Azeri  
Bamana  
Bulgarian  
Buryat  
Catalan  
Chaghatay  
Chechen  
Chinese (Mandarin)  
Coptic  
Croatian  
Czech  
Dutch  
English  
Estonian  
Evenki  
Finnish  
French  
Georgian  
German  
Gothic  
Greek (classical and modern)  
Haitian Creole  
Hebrew (Biblical and modern)  
Hindi  
Hungarian  
Italian  
Japanese  
Kazakh  
Kirghiz  
Korean  
Kurdish  
Lakota (Sioux)  
Latin  
Latvian  
Lithuanian  
Livonian

## Preparing Future Faculty

A number of graduate programs have established Preparing Future Faculty programs, which are designed to introduce graduate students to the full range of professional responsibilities in research, teaching, and service they will encounter in academia. These programs typically include more advanced courses in pedagogy, the opportunity to work closely with teaching mentors and to construct teaching portfolios, workshops on specialized topics, and expanded teaching possibilities, often in cooperation with other campuses of Indiana University or other institutions. For information about these programs, contact the individual departments.

## University Information Technology Services (UITS)

Students at Indiana University enjoy one of the most extensive information technology environments in the nation. Consistently ranked as one of America's "most wired" universities, IU is recognized as a leader and innovator in information technology. University Information Technology Services (UITS) is the main technology organization at IU and develops and maintains a modern information technology environment throughout the university in support of IU's vision for excellence in research, teaching, outreach, and lifelong learning.

UITS assists in academic success with tools and services to support the academic and administrative work of the university, including a high-speed campus network with wireless access, central Web hosting, a rich selection of free and low-cost software for personal use, tools and support for instruction and research, supercomputers for data analysis and visualization, and telecommunications systems.

At IUB, the UITS main office is at 2711 E. Tenth Street (Wrubel Computing Center) and several other Bloomington campus locations. At IUPUI, the UITS main office is in the Informatics and Communications Technology Complex (ICTC) at 535 W. Michigan Street.

More information on UITS support and services is available at <http://uits.iu.edu>.

## Research

UITS supports IU's teaching and research mission by providing and facilitating the use of centralized research computing resources. The high-performance computing systems dedicated

to IU research are configured to optimize stability and throughput for CPU intensive, I/O intensive, and/or memory intensive jobs. Use of these systems is restricted to IU faculty, faculty-sponsored graduate students, or faculty-sponsored staff, and support a broad range of areas, including life sciences, archaeology, astronomy, and computational physics.

An IBM Opteron cluster known as AVIDD (Analysis and Visualization of Instrument-Driven Data) is a distributed computing facility designed to process data generated by large scientific instruments. AVIDD runs Redhat Linux and supports parallel processing.

Other research computing resources include an IBM Blade cluster running AIX, and the Research Database Complex (RDC). The RDC supports large Oracle databases and is comprised of database servers (Sun V1280) and Web front-end to access them.

General-purpose and instructional computing is supported by a Sun V100 cluster known as Steel. To users, the group of servers appears as a single resource. Steel is available to any member of the university community and is popular among undergraduate Unix users.

Terabytes of data can be managed by IU's Massive Data Storage System (MDSS). This advanced system provides researchers with flexible, high-performance, high-capacity resources for data management.

Data visualization is another area of expertise at IU. The UITS Advanced Visualization Laboratory (AVL) supports two world-class, state-of-the-art displays within the new Informatics and Communications Technology Complex (ICTC) at IUPUI: an ultra-high-resolution display wall and a reconfigurable virtual reality theatre. These two resources complement AVL mid-range technologies, including the John-e-Box, commodity rendering clusters, Access Grid nodes, and 3D scanning devices.

## Networking

IU provides world-class network connectivity to its researchers in support of high-performance networking and research applications. IU is a founding member of Internet2 and runs the Network Operations Center for the Abilene Internet2 network. In addition to having its own fiber optic network, I-Light, connected to Internet2, IU is a member of TeraGrid, a national, open scientific discovery infrastructure. IU is also the lead U.S. institution in the TransPAC2 connection between U.S. research and education networks and the Asia Pacific Advanced Network.

In addition to high-speed Ethernet connections on campus, UITS provides wireless connection to the IU network at many locations on campus.

## UITS Technology Centers

UITS provides hundreds of computing workstations in both Student Technology Centers (STCs—located in academic buildings) and Residential Technology Centers (RTCs—located in campus housing), which offer students a rich array of up-to-date hardware, software, printers, and plotters. To meet the needs of a diverse student population, the STCs and RTCs provide a variety of hardware platforms and operating systems. Some STCs can be reserved for teaching classes.

## Campus Housing Technology Services

All campus housing computing support and telephone service is provided by UITS. Each campus residence offers high-speed Ethernet connectivity and dedicated residential support.

## Software, Hardware, and Wireless Phone Service

Free or low-cost software for students is available thanks to UITS's license agreements with companies such as Microsoft, Adobe, SPSS, and Symantec. Offerings include operating systems, antivirus programs, and software for word processing, spreadsheets, Web development, citation management, statistical analysis, graphic design, and more.

Many software titles are available for free download while other titles are available on CD at campus bookstores at deep discount. Students also benefit from educational discounts negotiated with vendors such as Apple, Dell, and CDW-G. Likewise, IU has an agreement with Cingular Wireless to provide discounted personal cellular services to students.

**Free and Low-Cost Information Technology Classes**  
UITS offers instructor-led computing workshops and provides self-study training resources. Workshops are available on more than 80 beginning to advanced computing and information technology topics.

## Expert Help 24/7

UITS offers a number of choices for award-winning information technology support:

- Visit Support Center walk-in services—IUB: Indiana Memorial Union (room M084) and in the Information Commons (first floor of the Herman B Wells Library); IUPUI: Informatics and Communications Technology Complex (room IT 129).
- Get UITS online support at [www.uits.iu.edu](http://www.uits.iu.edu).
- UITS Support Center phone consultants—IUB: 855-6789; IUPUI: 274-4357.
- E-mail the Support Center—[ithelp@indiana.edu](mailto:ithelp@indiana.edu).
- Chat with Support Center consultants—<https://ithelplive.iu.edu/>.

## News and Notices

Most students are automatically subscribed to the UITS Monitor (IUB) or UITS Newsbit (IUPUI) electronic newsletters when

they get their e-mail accounts. These newsletters provide award-winning weekly updates on a range of topics. Subscription information and Web-based news is available at <http://uitsnews.iu.edu/>.

## For More Information
