Katy Börner* (School of Library and Information Science), Blaise Cronin* (School of Library and Information Science), Alan Dennis* (Kelley School of Business), Thomas Duffy* (School of Education), Jeffrey Hart* (Political Science), Susan Herring* (School of Library and Information Science), Anne Massey* (Kelley School of Business), Christine Ogan* (Emerita, School of Journalism, School of Informatics), Harmeet Sawhney* (Telecommunications)

Associate Professors
Erik Bucy* (Telecommunications), Alice Robbin* (School of Library and Information Science), Howard Rosenbaum* (School of Library and Information Science)

Ph.D. Minor in Social Informatics

Social Informatics (SI) refers to the interdisciplinary study of the design, uses, and consequences of information and communications technologies (ICT) that takes into account their interaction with institutional and cultural contexts. Social Informatics research examines the roles of technologies in social and organizational change and the social shaping of ICT. SI research and SI courses are organized within diverse fields, including information systems, telecommunications, journalism, information science, and political science. One key goal of the field is to shape ICTs and policies relevant to them in order to enhance human communication and lead to more acceptable technological developments at organizational and social levels.

Course Requirement for the Ph.D. Minor in Social Informatics (12 credit hours)

This minor consists of four courses (12 credits), selected from an approved list of courses as described below. Please note that a student minoring in SI cannot include classes from his or her home department in the minor. Students who complete the Ph.D. minor in SI at Indiana University must demonstrate proficiency in a set of courses that examines the design, uses, consequences and/or policies of ICT use in social, cultural, or institutional contexts. The SI Ph.D. minor emphasizes theoretical and methodological issues, as well as substantive issues.

The student must submit a written proposal to the Steering Committee describing a detailed course of study. The proposal will explain the student’s focus of study, its relationship to SI, the relationship of proposed SI courses to the overall program of study, and the likely dissertation topic or area. It will also include the name of the student’s SI Ph.D. minor advisor. While the SI Ph.D. minor is likely to be completed before a student develops a detailed dissertation proposal, it is expected that the dissertation will address issues related to social informatics. If a student is interested in a course that is not on the approved course list, he or she can petition the director and Steering Committee to have the course included as part of the minor; the procedure is described below.

The complete proposal must be approved by the Steering Committee. The Steering Committee must also attest that the approved course of study has been completed successfully. Students seeking the Ph.D. minor in SI must obtain the approval of their Ph.D. Advisory Committees. The range of courses listed on the RKCSI courses at http://rkcsi.indiana.edu/index.php/courses is designed to enable students to construct a program for the Ph.D. minor in SI that is relevant to their primary research interests. This program of courses should include some courses that have strong theoretical and/or methodological content, as well as substantive issues. Students who propose taking “topics courses” (such as SLIS S604, S601/602, INFO I590, R601) as electives to help satisfy these requirements must satisfy the Steering Committee that the particular course they wish to take is related to the subject matter of SI. Further courses will be added to the list on an ongoing basis at the discretion of the Steering Committee.
Courses

Specific Course Requirements
Students seeking a Ph.D. minor in Social Informatics must complete four graduate level courses (12 hours) that have been selected from the courses listed on the RKCSI Courses at Indiana page; this list includes courses that have been specifically identified as approved for the Ph.D. minor. One of the four courses for the SI minor must be taken in the School of Journalism, the Department of Telecommunications, the School of Informatics and Computing, or the School of Library and Information Science and this course, which will serve as a foundation course for the minor, must be approved by the committee. This course should be taken first and may not be in the student’s home school or department. Other courses in these schools and departments may be taken as electives. Possibilities include:

School of Journalism
J530 Issues in New Communication Technologies
J614 Communication and National Development

School of Library and Information Science
S514 Computerization in Society
S518 Communication in Electronic Environments

Telecommunications Department
T551 Communication, Technology, and Society
T601 Origins of the Information Age

School of Informatics and Computing
I503 Social Impact of Information Technologies

In addition, students can propose, in consultation with their advisors, that their minor include other SI courses that are not on this list or that are on the list, but have not yet been formally approved for the SI minor. Such proposals should include syllabi and other detailed information about the course. The proposal should make a convincing case that the course is aligned with one or more main SI themes, such as the complex relationships among technology, people, their work and/or play, and the contexts within which people interact with technology.

Electives
Students seeking the Ph.D. minor in social informatics must complete an additional three courses (9 credit hours). These additional courses must be selected from the list above or the following list. The elective courses should be taken from at least two departments or schools other than the student’s home academic unit. The Social Informatics Program is developing rapidly at IU, and we expect that additional doctoral-level courses will be offered each year. Students can propose that their minors include other social informatics courses that are not included on this list. Such proposals should include syllabi and other detailed information about the course.
