School of Public and Environmental Affairs

The School of Public and Environmental Affairs (SPEA) is a multidisciplinary division of Indiana University. The school is organized as a professional school, committed to teaching, research, and service. The interests of the faculty and professional staff typically fall into one or more of the following areas: policy and administration; finance and economics; urban affairs; environmental science and policy; criminal justice, law, and public safety; health science and administration. The school's faculty, staff, and students work individually and jointly to solve problems that require SPEA's unique combination of in-depth knowledge in the natural, behavioral, social, and administrative sciences.

SPEA, because of its broad program base, can offer scientific and technical assistance to Indiana communities. The organizational design of the school reinforces a wide network of continuing relations with a large number of public agencies at all levels of government.

The School of Public and Environmental Affairs offers bachelor of science degrees and associate of science degrees. These programs provide a sound general education with specialized study of criminal justice, public affairs, public health, or environmental systems. The school also offers minors and certificate programs.

Placement and Internship Office

This Bloomington-based office assists students in making the transition from the university setting to the working world. Workshops, individual counseling, alumni mentoring, and an extensive library are provided. Further assistance is offered in finding internships and employment through SPEA V252 Career Development, and an advanced course, Personal Career Planning, SPEA V352. Other services include interviews with on-campus recruiters, automated resume preparation and distribution to employers, bulletins, directories, and networking.

An experiential requirement is a component of most of the undergraduate programs on the Bloomington campus, and students usually fulfill this with an internship. Internships give students an excellent opportunity to apply classroom theory and techniques to real-life experiences. Students must be in good academic standing and file an internship contract with the Placement and Internship

Office. In addition, SPEA students must have completed a specified course in their major/concentration and be a junior or senior in class standing.

The internship program is designed for maximum flexibility so that many valid learning experiences can qualify as internships. Work can be full- or part-time, paid or unpaid; however, prior approval by the student's faculty advisor is always required. After obtaining approval for an internship, a student may register for 1-6 credit hours, earning one credit for the first 120 hours of work and additional credit for 80 hours worth of work. All credit for an internship is awarded on an S/F (Satisfactory/Fail) basis. Credit is not granted for work experience obtained prior to approval of an internship and enrollment in the appropriate internship class.

Students seeking career-planning assistance should check with the Placement and Internship Office, located on the Bloomington campus in SPEA 200, (812) 855-9639, for answers to specific questions. Visit us on the Web at www.indiana.edu/~speacare.

SPEA Alumni Association

SPEA maintains contact with alumni through the SPEA Alumni Association, a constituent society within the parent Indiana University Alumni Association. The SPEA Alumni Association publishes the school's newsletter, *Alumni Update*, mailed three times a year to more than 16,000 SPEA alumni located in all 50 states and 21 foreign countries. Through this newsletter, alumni, faculty, and students are able to maintain contact. The Alumni Association raises funds for student scholarships with a summer golf outing in Indianapolis and with specialized efforts for specific programs. It sponsors the publication of an alumni directory and sponsors alumni events in several major cities. The SPEA Alumni Association is governed by an elected board of directors, which meets biannually.

SPEA Centers, Institutes, Programs, and Services

The School of Public and Environmental Affairs encompasses public service activities that complement innovative academic programs. The school provides a wide variety of services to a number of federal, state, and local agencies.

The Bowen Research Center, based in Indianapolis, is a joint effort of the School of Medicine and the School of Public and Environmental Affairs. Named for Governor Otis R. Bowen, the former director of the U.S. Department of Health and Human Services, the Bowen Research Center is the university's leader in health policy and health services research. The center's research program provides important research opportunities for faculty, staff, and students. The center's research focuses on primary health care services among rural and underserved populations; promotes health, disease prevention, and reduction of untimely loss of lives through research on lifestyle changes; develops methods to control health care costs and improve the effectiveness, efficiency, humaneness, and appropriateness of health services. The Bowen Research Center can be reached at www.spea.iupui.edu/bowen.

The Business/SPEA Library is a Bloomington branch of the Indiana University Libraries. It fulfills the research and study needs of the School of Business and the School of Public and Environmental Affairs. The library has extensive electronic and traditional resources. Detailed information about the Business/SPEA Library can be found at its Web site at www.indiana.edu/~bslib/index.html.

The Environmental Systems Application Center (ESAC) promotes, facilitates, and administers externally funded environmental

research within the school. The ESAC staff works with SPEA faculty, staff, and students to identify new research opportunities, prepare proposals, manage project budgets, carry out research, and prepare final reports. Center research often involves investigations of multiple disciplines and sometimes requires investigators from other Indiana University departments or other universities. This interdisciplinary, multi-institutional approach is a particular strength of ESAC. Although some basic research is conducted in the center, ESAC research activities typically have a strong public service focus of both state and national significance. Areas of expertise within the center include limnology, stream ecology, lake and watershed management, applied ecology, aquatic chemistry, environmental chemistry, hazardous waste management, risk assessment, and wetlands ecology. In carrying out its mission, the center utilizes student research assistants whenever possible, providing valuable experience and financial assistance to students in the process.

The Executive Education Program offers governmental, health care and nonprofit leaders and managers concentrated academic offerings as well as short-term noncredit seminars. Thousands of public managers each year attend Executive Education Programs to update techniques and hone administrative skills for increased managerial effectiveness.

The Geographic Information Systems Laboratory (GIS) is a state-of-the-art computing facility. The lab has information processing technology that manages, analyzes, and displays spatial data for scientific and policy research. Information about the GIS Lab can be found at www.indiana.edu/~speagis.

The Great Lakes Center for Public Affairs and Administration is a unit of the Division of Public and Environmental Affairs on the IU Northwest campus. The center conducts research and provides technical services to units of governments and other institutions in northwest Indiana. The center also focuses on issues in public affairs and administration in the Great Lakes region.

The Indiana Conflict Resolution Institute (ICRI) has a three-fold mission: teaching, research, and service in conflict resolution and dispute-resolution processes. ICRI's teaching mission includes the development of undergraduate, graduate, continuing education, and executive education curricula to foster a deeper understanding and broader use of dispute-resolution processes such as mediation facilitation, early neutral evaluation, ombudsmen programs, arbitration, partnering, and related consensus-based processes. Its research mission includes evaluation of dispute-resolution processes and programs in public and nonprofit organizations, with the goal of contributing to continuous improvement in both

the processes, and knowledge of their impact on participants and organizations. ICRI's service mission is to provide information and technical assistance regarding dispute resolution for the state of Indiana. Additional information about ICRI can be found at www.spea.indiana.edu/icri.

The Institute for Development Strategies, sponsored by the Office of Research and the University Graduate School and the School of Public and Environmental Affairs, is a university-wide research program linking faculty resources from various departments and campuses, and integrating them with external projects and research being undertaken elsewhere in this country and in other countries. The institute is interdisciplinary and focuses on research to promote economic development at the city, regional, national, and international levels. A particular focus of the institute is on the links between globalization, entrepreneurship, and the strategic management of regions to promote economic development.

The Institute for Family and Social Responsibility (FASR) is a joint effort of the School of Public and Environmental Affairs and the School of Social Work, with its focus on social policy research and outreach activities. The institute's mission is to bring together the resources of citizens, governments, communities, and Indiana University to better the lives of children and families. Ongoing research projects examine the impacts of welfare reforms; the adequacy of child support guidelines; community responses to the Temporary Assistance to Needy Families legislation; AIDS education for incarcerated youth; and the homeless, child welfare, and fatherhood programs. The institute serves as the National Child Support Enforcement Research Clearinghouse. It also administers a university-wide competitive student internship program in collaboration with the Indiana Family Social Services Administration. The institute is a founding partner of the Partners for Hoosier Communities, a project that brings together economic development and social welfare program administrators across the state. The FASR Institute is also a member of the Indiana Council of Family Organizations, which sponsors biannual Family Impact seminars for state legislators and policy makers. Further information concerning FASR can be found at www.spea.indiana.edu/fasr/.

The Institute for the Study of Government and the Nonprofit Sector is a joint initiative of Indiana University's Center on Philanthropy, the Center for Urban Policy and the Environment, and the School of Public and Environmental Affairs. The purpose of the institute is to support intellectual exchange between faculty members, stimulate extramural support for faculty research, and engage students and returning practitioners in a discussion of issues involving the

intersection of government and the nonprofit sector. The mission of the institute is to create and disseminate knowledge about the complex linkages between government and the nonprofit sector and to develop specialized faculty expertise. The institute strives to be the preeminent national and international resource on matters related to government and the nonprofit sector. The institute can be reached on the Web at www.spea.iupui.edu/isgns/home.htm.

The Midwestern Regional Center for Global Environmental Change, located on the Bloomington campus, is one of six regional centers of the National Institute for Global Environmental Change, funded by the U.S. Department of Energy. The Midwestern center, together with the other five centers, provides research support in the field of global environmental change. The other regional centers are located at the University of California—Davis, University of Nebraska—Lincoln, University of Alabama, Harvard University, and Tulane University. The center supports the mission of the national institute by participating in a variety of research activities that focus on global climate change, development of early warning systems for energy-related changes, analysis of energy-related environmental risks, training of environmental scientists, and preparation of public education programs on global climate change.

The Transportation Research Center was established to coordinate and facilitate the transportation research activities of the university. The center's expertise lies in the areas of transportation safety, urban public transit, transport management, and transport regulatory policy. The center uses a staff of professional researchers, faculty, and graduate students in performing research projects for federal, state, and local government agencies, and for the private sector.

The Center for Urban Policy and the Environment helps governmental, nonprofit, and corporate clients address and plan for complex urban and environmental challenges. Center faculty and staff can provide services in economic analysis, conflict avoidance and resolution, strategic planning, organizational and fiscal capacity analysis, governance, criminal justice and policing, health administration, nonprofit management, and environmental resource management. Since 1992, the center has successfully provided research and technical assistance to governmental agencies throughout Indiana, the Indiana State Legislature, the Office of the Governor, cities and towns across the state, private organizations, nonprofit groups, other states, and several countries. Further information can be found at www.spea.iupui.edu/cupe/.

Alpha Phi Sigma

Alpha Phi Sigma is the national criminal justice honor society, with chapters established on the Northwest, Fort Wayne, South Bend, Kokomo, and Indianapolis campuses of Indiana University. The society recognizes scholastic excellence of students in the field of criminal justice. It was founded in 1942 and was admitted to the Association of College Honor Societies in 1980. To be eligible, undergraduate students must have earned an overall grade point average of at least 3.00 for at least 40 credit hours of course work, and must include at least four criminal justice courses with a minimum 3.20 grade point average. To remain in good standing, students must maintain an overall grade point average of at least 3.00 and a grade point average of at least 3.20 in all criminal justice courses completed.

Pi Alpha Alpha

Pi Alpha Alpha is the national honorary society for schools of public affairs and administration. The society acknowledges outstanding scholarship and contributions to these fields. It was founded in 1972 by the National Association of Schools of Public Affairs and Administration (NASPAA) to honor those whose performance in public affairs has been distinguished. The Indiana chapter of Pi Alpha Alpha is a charter chapter. Membership in Pi Alpha Alpha may be compared to membership in Phi Beta Kappa for liberal arts graduates. A person evaluating credentials in the various fields of public service should recognize the professional quality such a membership represents.

Undergraduate students are eligible for Pi Alpha Alpha membership when they are in the top 10 percent of their graduating class with a minimum grade point average of 3.50 in at least 15 credit hours of SPEA courses, when they are in the last semester of the junior year or in the senior year, and when they have earned a grade point average of at least 3.00 in all course work.

Alumni are eligible for membership if they meet all the requirements of student membership, even if they graduated before induction by the Indiana chapter.

Honorary membership is available to any person who has achieved distinction in public administration and who has the distinguished qualities that Pi Alpha Alpha fosters.

Undergraduate Programs

The School of Public and Environmental Affairs offers a wide range of undergraduate

Requirements for Admission

Admission to the School of Public and Environmental Affairs on all campuses, except Bloomington, Indianapolis, and Fort Wayne, requires sophomore standing and a minimum cumulative grade point average of 2.00.

SPEA Bloomington requires application to its undergraduate programs and has a competitive admission process. Students are required to complete one of the courses listed below with a minimum grade of C.

SPEA V160 National and International Policy (3 cr.)
SPEA V161 Urban Problems and Solutions (3 cr.)
SPEA E162 Environment and People (3 cr.)
SPEA E272 Introduction to Environmental Sciences (3 cr.)

Students should apply for admission when they are enrolled in the preadmission course. Admission decisions are based on the grade in the above required course, the SPEA GPA, and the cumulative GPA. A minimum cumulative GPA requirement for admission is established each semester.

Applications for the Bloomington programs are available in the SPEA Undergraduate Advising Office, SPEA 240. Application

deadlines are May 1 for fall admission and December 1 for spring admission.

SPEA Indianapolis has a special program to admit freshman students simultaneously to SPEA and to the University College. To be eligible for this dual admission, applicants must meet the general university and campus requirements for admission; have a minimum combined SAT (or equivalent) test score of 900 (recentered SAT I test score of 1010); be in the top quartile in their high school ranking; and score at the college level in English, mathematics, and reading on the IUPUI placement tests.

Applicants who have already graduated from high school and who have *not* taken the SAT or equivalent test will be required to score at the college level in English, mathematics, and reading on the IUPUI placement tests to be eligible for direct admission to SPEA Indianapolis.

Students who do not qualify for dual admission at Indianapolis or choose not to apply for freshman-level entry may be admitted to the School of Public and Environmental Affairs after they have completed 26 credit hours (sophomore standing) with a minimum cumulative grade point average of 2.00.

SPEA Fort Wayne admits university-accepted students directly into the pre-SPEA program. To be eligible for admission to SPEA degree programs, a student must have earned a 2.30 cumulative GPA and completed 30 credit hours, including C or better in the math and computer science requirement, ENG W131, SPEA V170, and SPEA J101. Transfer students and those who wish to change their major to a SPEA degree program are accepted into the pre-SPEA program until these prerequisites are met.

Intercampus Transfer

Students admitted to the School of Public and Environmental Affairs at any campus of Indiana University may transfer permanently to SPEA on another campus, provided they meet the requirements for admission and good academic standing at the desired campus. Students wanting a temporary intercampus transfer need only meet the good academic standing requirements.

Policies Governing the Undergraduate Program

The following academic policies of the School of Public and Environmental Affairs are applicable to all SPEA undergraduate programs regardless of the campus where they are offered. Additional policies at individual campuses may also apply to SPEA students.

Grading Policies SPEA follows the official grading system of Indiana University, which is as follows:

A+, A	= 4.00	C	= 2.00
A-	= 3.70	C-	= 1.70
B+	= 3.30	D+	= 1.30
B	= 3.00	D	= 1.00
B-	= 2.70	D-	= 0.70
C+	= 2.30	F	= 0.00

The following grades carry no points: I (Incomplete—an Incomplete will change to an F if the work is not completed within the time period specified by the instructor [an instructor can specify any period of time up to one year]), NR (No Grade Reported), P (Pass), R (Deferred), S (Satisfactory), W (Withdrawal—check the current *Schedule of Classes* for deadlines). SPEA students who have retaken a previously failed course (must be the same department and course number) may request to have only the last grade computed in their grade point average. The original F will be replaced by the FX grade. Requests will be honored only for a maximum of three courses, totaling no more than 10 credit hours. If a course is failed twice, only one F can be removed. The Indianapolis campus has an expanded policy in regards to computing the cumulative GPA. When a course is taken a second time, students may replace five grades for a total of 15 hours.

Good Academic Standing Students are in good academic standing when their semester and their cumulative grade point averages are 2.00 or above, and their grade point average in all courses counting in the SPEA core and major/concentration requirements is at least 2.30. Students must be in good academic standing to graduate.

Probation Students will be placed on academic probation if their cumulative or semester grade point average is below 2.00 or their SPEA core and major/concentration GPA falls below 2.30. In order for the core and major/concentration GPA to be considered, students must have completed 12 or more credit hours in the core and major/concentration.

Critical Probation After one semester on probation, students who fail to return to good academic standing will be placed on critical probation. At the discretion of the undergraduate program director, these students could be dismissed. If a student is given the opportunity to enroll under critical probation, SPEA will establish strict conditions that must be met before that student will be allowed to register for future classes.

Dismissal Students can be dismissed if they fail to return to good academic standing after one semester on critical probation. Students may also be dismissed if, in the opinion of the

undergraduate program director, they are not making satisfactory progress toward their degrees.

Readmission Dismissed students must petition their campus undergraduate program director for readmission. Dismissed students whose petitions are denied will not be allowed to register.

Grade Appeals Students have one year to appeal a grade given by a SPEA faculty member. Resolution of the issue with the class instructor must be attempted before submitting a written appeal to the appropriate program director.

Student Rights and Responsibilities These provide for due process in the event of disciplinary or other actions and are explained in detail in the student handbook, *Code of Student Rights, Responsibilities, and Conduct*. In accordance with federal law, student records are confidential and are available to other persons only under specific conditions, as outlined in university regulations. Students are responsible for planning their own academic programs and for meeting the requirements for their degree or certificate programs. Faculty and academic advisors are obligated only to assist students in meeting this responsibility.

Academic Integrity This is a basic principle requiring that students take credit only for ideas and efforts that are their own. Academic dishonesty violates that principle and undermines the bonds of trust and cooperation among members of the university community. Penalties and procedures that are applicable when academic misconduct or dishonesty occurs are provided in the *Code of Student Rights, Responsibilities, and Conduct*. The policy on academic dishonesty is also published each semester in the Bloomington *Schedule of Classes*.

Sex Offenders Screening Policy for Students/Applicants Indianapolis applicants should be aware that criminal convictions may result in ineligibility for participation in certain courses/activities within the School of Public and Environmental Affairs. Questions regarding school policy on such matters should be addressed to the appropriate program director or the director of student services.

Other Policies Concerning Degree Requirements

Bulletin Policy Students are expected to complete the requirements for their undergraduate degree within 10 years of admission to the School of Public and Environmental Affairs. Students are allowed to continue beyond this time period only at the discretion of the undergraduate program director or campus director. If a student has not taken classes for three years or more, that

student must satisfy the program requirements of the School of Public and Environmental Affairs in effect at the time of reactivation. Requests for deviation from requirements listed in the bulletin must be approved in writing by the program director, whose decision is final.

Hours Requirements Students must successfully complete a minimum of 120 credit hours for most of the Bachelor of Science degrees and a minimum of 60 credit hours for the Associate of Science degree. However, the Bachelor of Science in Environmental Science requires 122 credit hours. The campus at which a student completes the plurality of **required** course work will award the degree, provided that campus is authorized to grant the degree/major/concentration and that the student has been admitted to that campus. Students may transfer no more than 90 credit hours (60 credits from a junior college) toward a Bachelor of Science degree or 30 credit hours toward an Associate of Science degree. Class standing, based on total credit hours that count toward minimum degree requirements, is as follows: senior, 86 or more; junior, 56-85; sophomore, 26-55; freshman, fewer than 26.

Grade Point Average Requirement A minimum cumulative GPA of 2.00 is required for the B.S. and A.S. degrees. In addition, a SPEA core and major/concentration GPA of 2.30 must be maintained in order to graduate. As a joint degree from the College of Arts and Sciences and the School of Public Affairs, the B.S. in Environmental Science does not require a GPA of 2.30 in the major/concentration. For students seeking certificates or minors from SPEA, the minimum GPA requirement is 2.00 in all applicable course work.

Double-Counting Generally, courses taken to meet a specific degree requirement cannot be double-counted (used to satisfy any other degree requirement). Two exceptions to this rule are: Environmental Management majors may double-count SPEA E272, Introduction to Environmental Sciences, as a core and major/concentration requirement, and SPEA students earning a SPEA minor may double-count two minor courses.

Application for Degree All students must fill out an application for degree at the SPEA Records office on their campus. This application is usually filed six months before the expected graduation date.

Degrees Awarded with Distinction SPEA recognizes outstanding performance by awarding bachelor's and associate degrees with three levels of distinction to students who rank within the upper 10 percent of their SPEA graduating class and have completed a minimum of 60 hours at Indiana University for a B.S. (30 hours for the A.S.). The levels of distinction are as follows: highest: 3.90 and

above, high: 3.70 through 3.89, distinction: 3.50 through 3.69.

Requirements for a Second Bachelor's Degree Students must petition for approval to work toward a second bachelor's degree. If permission is granted, students are required to take 30 credit hours beyond the credits used for the first bachelor's degree and satisfy all the requirements for the second degree. Generally, SPEA encourages students to work toward a graduate degree rather than a second bachelor's degree.

Available Options A student in good academic standing may choose to take a maximum of eight elective courses (two per academic year) pass/fail for the B.S. degree or two courses for the A.S. degree. Deadlines for exercising this option are published in the *Schedule of Classes* and are strictly enforced.

With prior approval, a student may take three courses, totaling no more than 10 credit hours, by correspondence through the IU Division of Extended Studies, Independent Study Program. Under no circumstances may a student satisfy a core or major/concentration requirement by correspondence.

With SPEA faculty approval, a student in good standing may earn a maximum of 9 credit hours through the SPEA **internship** program. Fort Wayne limits the internship to 12 credit hours: six credit hours within the concentration/major electives and an additional six credit hours that can count for general electives. The SPEA internship program is described in more detail elsewhere in this bulletin.

SPEA students may choose to pursue a **minor** from another school, department, or within SPEA in an area other than their degree or major/concentration. Students interested in a minor should contact that department for additional information.

Honors and Accelerated Master's Programs

Sophomores and juniors who have completed at least 45 credit hours with a cumulative grade point average of 3.50 or higher may apply for the Honors Program. The primary requirements are that a student maintain the 3.50 GPA, successfully complete designated honors courses, and write a senior thesis. Students may propose a unique course of study in consultation with the SPEA honors advisor.

The Accelerated Master's Program (A.M.P.) is a competitive program for outstanding SPEA students. Students may apply to the Master of Public Affairs (M.P.A.), the Master of Health Administration (M.H.A.) or the Master of

Science in Environmental Science (M.S.E.S.) early in their junior year.

Participation in this program allows the student to fulfill some graduate program requirements during the senior year. Graduate courses count for both graduate and undergraduate degree requirements. Before starting the graduate program, students must have satisfied **all** general education and core requirements with a minimum of 96 credit hours completed toward their bachelor's degree (90 credit hours for students seeking the M.H.A. degree). For additional information, students should contact the appropriate program director.

International Programs

SPEA offers several opportunities to study abroad for credit:

- The Rotterdam Program in the Netherlands (spring and fall)
- The Parliamentary Internship Program in Canberra, Australia (year-round)

The Rotterdam program is a one-semester program that allows students to take 15 credit hours in the general area of public affairs. The Parliamentary internship is available with or without course work and is offered each semester and during the summer (the Australian winter). In addition, IU offers many other officially approved study abroad programs that can, with the authorization of your advisor, count for SPEA credit.

All these programs are taught in English, and the IU credit obtained costs the same as it would if you remained on campus. Financial aid that you have obtained for your studies is normally applied to these overseas experiences. Experience has taught us that studying abroad does not adversely affect your GPA, increase your cost of study, or delay your graduation, even though many people seem to think one or all of these things will happen.

Our purpose in creating these study abroad opportunities is to provide you with a unique chance to broaden your horizons, help you prepare yourself for a world that is becoming much more international and global, and allow you to challenge yourself by facing something new. Of course, there are opportunities to travel and socialize as well as study—and that is all part of the educational experience. More than 200 SPEA students have benefited from this opportunity. There are many programs from which to choose, and students are advised to make use of the overseas study resource center on the third floor of Franklin Hall. For further information, consult SPEA's international program office in SPEA 241.

Washington Leadership Program

The School of Public and Environmental Affairs offers the Washington Leadership Program each fall and spring semester in Washington, D.C. This program consists of two senior-level seminars (each worth 3 credit hours) and an internship (worth 5 or 6 credit hours). Students complete internships by working four days per week in an assigned congressional office, public interest group, federal agency, or nonprofit organization.

Students reside and have their classes in Washington, D.C. Tuition is based on the regular fees for Indiana University. Students in the program remain eligible for any scholarships or financial aid they would normally receive as Indiana University students. Interested students should contact the SPEA program or campus director. In Bloomington, students should contact the SPEA placement and internship office.

Bloomington and Indianapolis Leadership Programs

The School of Public and Environmental Affairs offers students the opportunity to earn six academic credits through participation in the Bloomington or Indianapolis Leadership Programs. These programs, available each fall and spring semester, consist of an internship, monthly seminars, a final paper, and a presentation to all intern sponsors for that semester. Students complete the internship by working 24 hours per week in an assigned local or state government agency.

Students can maintain full-time status at Indiana University by taking six additional credit hours. Participants in these programs remain eligible for the scholarships or financial aid they would normally receive as Indiana University students. For more information on these programs, contact the SPEA Placement and Internship Office in Bloomington.

Bloomington Programs

Bachelor of Science Degree Programs

The School of Public and Environmental Affairs recognizes the complex problems facing our society such as global warming, hazardous waste, escalating health care costs, balance of trade, and international relations. Through the three bachelor of science degree programs, the school develops its students' problem-solving abilities and organizational skills so that they may contribute possible solutions to these and other problems.

Students with a Bachelor of Science in Public Affairs degree can continue their education in law, planning, public affairs, environmental science, or business administration. For those who choose immediate employment, our program is flexible enough to provide the necessary background to begin a career in the public, nonprofit, or private sector.

The Bachelor of Science in Public Health can lead to graduate study in health administration or other related professional fields. Students can also pursue careers in either the public or private sector in areas such as environmental health, health administration, epidemiology, or health policy and planning.

The Bachelor of Science in Environmental Science is an undergraduate degree program that specifically considers the environment as a scientific entity. This degree should be selected by students preparing for employment as professionals in environmental science or preparing for graduate study in environmental science or in one of the traditional sciences.

Bachelor of Science in Public Affairs

The Bachelor of Science in Public Affairs requires 120 credit hours. The Bloomington campus offers five majors: Environmental Management, Legal Studies, Management, Policy Studies, and Public Financial Management.

Environmental Science Senior Research

Guided by a faculty member, each student undertakes a project closely related to his or her concentration. A minimum of 3 credit hours of senior research must be completed within the department of the sponsoring faculty member. A written report and public oral presentation are required.

Concentration Area (Minimum of 18 credit hours)

Whereas the core curriculum provides each student with a solid background in the basic subjects pertinent to the environmental sciences, the concentration is aimed at preparing students for graduate study or professional employment in specific fields. A partial list of the available topics includes atmospheric sciences, applied ecology, earth-system science, environmental toxicology, geochemistry, geophysics, hydrology, oceanic sciences, surface-water studies, and systems modeling. Additional topics can be defined in order to fit specific needs or opportunities. Each program must be approved by the Interdepartmental Committee.

Associate of Science Degree Programs

The School of Public and Environmental Affairs offers an associate degree program.

Courses that meet associate degree requirements generally can be applied to a subsequent baccalaureate degree program. The following are general requirements for the completion of an associate degree:

1. Students must apply for admission to the Associate Degree Program before completing 35 credit hours of course work toward the degree. Applications are available in the records office.
2. A minimum of 60 credit hours with a 2.00 cumulative average or higher and a 2.30 average or higher in core and concentration courses is required. All requirements for this degree must be satisfied before earning 86 credit hours.
3. A limited number of courses may be transferred from other accredited institutions or be taken through independent study.

4. Courses taken to meet specific degree requirements cannot be double-counted (used to satisfy any other degree requirement).
5. A maximum of two elective courses may be taken pass-fail in this degree.

Individuals interested in one or more of these minors should inquire in the SPEA undergraduate advising office (SPEA 240) for additional details. Students should check with their degree-granting unit to make sure they are eligible for the SPEA minor of their choice. Students who successfully complete the requirements will have the minor conferred with their degree. SPEA's multidisciplinary faculty and curricula address environmental, health, public policy, and management issues from a variety of perspectives. A minor in SPEA can enhance career opportunities for liberal arts and other majors.

American Humanics Certification

The School of Public and Environmental Affairs, in partnership with American Humanics, Inc., offers certification in nonprofit management. Students may also simultaneously enroll in the Nonprofit Management Certificate, offered by Indiana University, through SPEA. This certification prepares undergraduate college students for professional careers in the expanding job market of nonprofit and youth and human service organizations. Upon completion of the American Humanics program, students will be certified, through American Humanics, Inc.,

for possible positions of leadership with collaborating organizations such as the YMCA, American Red Cross, Big Brothers/Big Sisters, Habitat for Humanity, and many other nonprofit agencies at both the local and national level.

This certificate program requires the demonstration of a prescribed set of knowledge and skill competencies and the completion of a 300-hour internship program. These competencies may be obtained through completion of a set of courses, professional workshops, the internship, and participation in the American Humanics Student Association.

Students interested in learning more about the certificate should contact the American Humanics director in SPEA 200 or a SPEA academic advisor.

Indianapolis Programs

Bachelor of Science Degree Programs

The School of Public and Environmental Affairs recognizes the complex problems facing our society, such as global warming, hazardous waste, escalating health care costs, balance of trade, and international relations. Through the four bachelor of science degree programs the school develops its students' problem-solving abilities and organizational skills so that they may contribute possible solutions to these and other problems.

Students with a Bachelor of Science in Public Affairs degree can continue their education in law, planning, public affairs, environmental science, or business administration. For those who choose immediate employment, our program is flexible enough to provide the necessary background to begin a career in the public, nonprofit, or private sector.

The Bachelor of Science in Public Health can lead to graduate study in health administration or other related professional fields. Students can also pursue careers in either the public or private sector in areas such as environmental health, health administration, epidemiology, or health policy and planning.

The Bachelor of Science in Health Services Management is open to experienced health services professionals with an associate degree and credentials in a health field. This program provides specialized management training to qualified students.

The Bachelor of Science in Criminal Justice degree is excellent preparation for a career in corrections, law enforcement, or probation. Students could also continue their education by studying public affairs, law, social work, and other social sciences.

Fort Wayne Programs

Bachelor of Science Degree Programs

The School of Public and Environmental Affairs recognizes the complex problems facing our society, such as global warming, hazardous waste, escalating health care costs, balance of trade, and international relations. Through the three bachelor of science degree programs, the school develops its students' problem-solving abilities and organizational skills so that they may contribute possible solutions to these and other problems.

Students with a Bachelor of Science in Public Affairs degree can continue their education in law, planning, public affairs, environmental science, or business administration. For those who choose immediate employment, our program is flexible enough to provide the necessary background to begin a career in the public, nonprofit, or private sector.

The Bachelor of Science in Health Services Management is open to experienced health services professionals with an associate degree and credentials in a health field. This program provides specialized management training to qualified students.

The Bachelor of Science in Criminal Justice degree is excellent preparation for a career in corrections, law enforcement, or probation. Students could also continue their education by studying public affairs, law, social work, and other social sciences.

Northwest (Gary) Programs

Bachelor of Science Degree Programs

The School of Public and Environmental Affairs recognizes the complex problems facing our society, such as global warming, hazardous waste, escalating health care costs, balance of trade, and international relations. Through the three bachelor of science degree programs, the school develops its students' problem-solving abilities and organizational skills so that they may contribute possible solutions to these and other problems.

Students with a Bachelor of Science in Public Affairs degree can continue their education in law, planning, public affairs, environmental science, or business administration. For those who choose immediate employment, our program is flexible enough to provide the necessary background to begin a career in the public, nonprofit, or private sector.

The Bachelor of Science in Health Services Management is open to experienced health services professionals with an associate degree and credentials in a health field. This program provides specialized management training to qualified students.

The Bachelor of Science in Criminal Justice degree is excellent preparation for a career in corrections, law enforcement, or probation. Students could also continue their education by studying public affairs, law, social work, and other social sciences.

South Bend Programs

Bachelor of Science Degree Programs

The School of Public and Environmental Affairs recognizes the complex problems facing our society, such as global warming, hazardous waste, escalating health care costs, balance of trade, and international relations. Through the three bachelor of science degree programs, the school develops its students' problem-solving abilities and organizational skills so that they may contribute possible solutions to these and other problems.

Students with a Bachelor of Science in Public Affairs degree can continue their education in law, planning, public affairs, environmental science, or business administration. For those who choose immediate employment, our program is flexible enough to provide the necessary background to begin a career in the public, nonprofit, or private sector.

The Bachelor of Science in Health Services Management is open to experienced health services professionals with an associate degree and credentials in a health field. This program provides specialized management training to qualified students.

The Bachelor of Science in Criminal Justice degree is excellent preparation for a career in corrections, law enforcement, or probation. Students could also continue their education by studying public affairs, law, social work, and other social sciences.

Indiana University

When you become a student at Indiana University, you join an academic community internationally known for the excellence and diversity of its programs. With 1,013 degree programs, the university attracts students from all 50 states and around the world. The full-time faculty numbers more than 4,000 and includes members of many academic societies such as the American Academy of Arts and Sciences, the American Philosophical Society, and the National Academy of Sciences.

Indiana University was founded at Bloomington in 1820 and is one of the oldest and largest institutions of higher education in the Midwest. It serves 92,000 students on eight campuses. The residential campus at Bloomington and the urban center at Indianapolis form the core of the university. Campuses in Gary, Fort Wayne, Kokomo, New Albany, Richmond, and South Bend join Bloomington and Indianapolis in bringing an education of high quality within reach of all of Indiana's citizens.

General Policies

Equal Opportunity/Affirmative Action Policy of Indiana University

Indiana University pledges itself to continue its commitment to the achievement of equal opportunity within the university and throughout American society as a whole. In this regard, Indiana University will recruit, hire, promote, educate, and provide services to persons based upon their individual qualifications. Indiana University prohibits discrimination based on arbitrary consideration of such characteristics as age, color, disability, ethnicity, gender, marital status, national origin, race, religion, sexual orientation, or veteran status.

Indiana University shall take affirmative action, positive and extraordinary, to overcome the discriminatory effects of traditional policies and procedures with regard to the disabled, minorities, women, and Vietnam-era veterans.

An Affirmative Action office on each campus monitors the university's policies and assists individuals who have questions or problems related to discrimination.

Special Assistance

For people who have disabilities and need special assistance, special arrangements can be made to accommodate most needs. In Bloomington, contact Disabled Student Services at (812) 855-7578; at IUPUI, contact Adaptive Educational Services at (317) 274-3241.

Confidentiality of Student Records

In accordance with federal statutes and regulations, student records are confidential and available for disclosure to persons other than the student only under stated conditions.

Student Rights and Responsibilities

A statement of students' rights and responsibilities is published in a handbook, *Code of Student Rights, Responsibilities, and Conduct*, which contains a description of due process hearings in the event of disciplinary action.

Degree Requirements Students are responsible for understanding all requirements for graduation and for completing them by the time they expect to graduate. Information about a specific school or division can be found in the front section of the bulletin for that school.

Requests for deviation from department, program, or school requirements may be granted only by written approval from the respective chairperson, director, or dean (or a designated administrative representative). Disposition at each level is final.

Undergraduate Admissions Policy

Indiana University has adopted the following admissions policy to ensure that undergraduate students are properly prepared for college work. These standards seek to ensure either adequate academic preparation in high school or evidence of unusual motivation on the part of each student admitted to the university. Applicants for admission to Indiana University are expected to meet the following criteria.

Freshman Students¹

1. Graduation from an accredited Indiana high school or comparable out-of-state institution, successfully completing a minimum of 28 semesters of college-preparatory courses including the following:
 - (a) Eight semesters of English. (One semester each of speech and journalism may be included.)
 - (b) Four semesters of social science (economics, government, history, psychology, or sociology).
 - (c) Four semesters of algebra (two semesters of which must be advanced algebra) and two semesters of geometry.
 - (d) Two semesters of laboratory science (biology, chemistry, or physics).

¹Some academic programs require specific qualifications in addition to those enumerated in this policy.

- (e) Eight semesters in some combination of foreign language; additional mathematics, laboratory science, or social science; computer science; and other courses of a college-preparatory nature.
 - (f) Four semesters of foreign language are strongly recommended.
 - (g) Courses to develop writing composition skills are strongly recommended.
2. A rank in the upper half of the high school graduating class for Indiana residents or a rank in the upper third of the high school graduating class for out-of-state residents.
 3. A score above the median established by Indiana students on a nationally standardized admissions test. Students who have been out of high school for three or more years do not have to submit test scores unless required for admission to specific programs.
 4. Each campus may accept students who are deficient in (1), (2), or (3) of the above specifications upon receipt of such evidence as the combination of strength of college-preparatory program, rank in class, grades and grade trends in college-preparatory courses, and standardized test scores. For persons who do not meet the above criteria and who have been out of high school three or more years, admission can be based on other factors such as a General Educational Development (GED) diploma, maturity, work experience, military service, and other factors as determined by the campus.
 5. Each campus, at its discretion, may admit a student on a probationary basis and/or through faculty sponsorship.

Transfer Students¹

1. Submission of official transcripts from all previous institutions attended.
2. The transcripts must reflect a cumulative grade point average of at least a 2.0 (on a 4.0 scale) for Indiana residents and at least a 2.5 (on a 4.0 scale) for out-of-state residents.
3. If the student has fewer than 26 transferable credit hours, the high school record should reflect compliance with freshman admission requirements as specified above.
4. The credentials of students seeking transfer to Indiana University will be evaluated on an individual basis.

When students do not qualify upon first application, they will be counseled about ways of removing deficiencies so that they may

¹Some academic programs require specific qualifications in addition to those enumerated in this policy.

qualify for admission at a later date. If any provision of this policy is held invalid, the invalidity does not affect other provisions of this policy which can be given effect without the invalid provision, and to this end the provisions of this policy are severable.

Transfer to Other Indiana University Campuses

The policy stated below concerning transfer credit pertains to undergraduate students only.

Indiana University credits transferred from one campus of Indiana University to another will be evaluated and accepted in terms at least as favorable as credits transferred from other accredited institutions in the United States. No review of the credits will be undertaken except in good faith terms of the same criteria used in evaluating external credits. In fact, students transferring within the Indiana University system are treated much more favorably because of the similarity of course work on the eight campuses.

Students who want to transfer to another campus should follow these procedures:

1. Inform your academic advisor of your decision as soon as possible. Degree requirements may vary from one campus to another but if your advisor knows of your plan, your academic program can be designed to meet the requirements of the campus you will eventually attend.
2. Contact the department chairperson (or the designated advisor) at the campus you plan to attend. Discuss your plan and ask about any special procedures. For example, students transferring in fine arts must submit portfolios of their work. Music transfer students must be auditioned.
3. As the date of transfer approaches, check with your campus registrar to get information on registration dates and procedures on the other campus. If there is a preregistration or preenrollment procedure at the other campus, you should plan to take advantage of it. Contact the registrar of the other campus to determine whether you can fulfill any of these responsibilities by phone. Your registrar has a direct telephone line to all other registrars.
4. When you arrive on the new campus, contact your assigned academic adviser or department chairperson as soon as possible. Discuss your academic progress to date and the additional course work required for your program.

Rules Determining Resident and Nonresident Student Status for Indiana University Fee Purposes

These Rules establish the policy under which students shall be classified as residents or nonresidents upon all campuses of Indiana University for University fee purposes. Nonresident students shall pay a nonresident fee in addition to fees paid by a resident student.

These Rules shall take effect February 1, 1974; provided, that no person properly classified as a resident student before February 1, 1974, shall be adversely affected by this Rule, if he or she attended the University before that date and while he or she remains continuously enrolled in the University.

1. "Residence" as the term, or any of its variations (e.g., "resided"), as used in the context of these Rules, means the place where an individual has his or her permanent home, at which he or she remains when not called elsewhere for labor, studies, or other special or temporary purposes, and to which he or she returns in seasons of repose. It is the place a person has voluntarily fixed as a permanent habitation for himself or herself with an intent to remain in such place for an indefinite period. A person at any one time has but one residence, and a residence cannot be lost until another is gained.
 - (a) A person entering the state from another state or country does not at that time acquire residence for the purpose of these Rules, but except as provided in Rule 2(c)¹, such person must be a resident for 12 months in order to qualify as a resident student for fee purposes.
 - (b) Physical presence in Indiana for the predominant purpose of attending a college, university, or other institution of higher education, shall not be counted in determining the 12-month period of residence; nor shall absence from Indiana for such purpose deprive a person of resident student status.
2. A person shall be classified as a "resident student" if he or she has continuously resided in Indiana for at least 12 consecutive months immediately preceding the first scheduled day of classes of the semester or other session in which the individual registers in the

University, subject to the exception in (c)¹ below.

- (a) The residence of an unemancipated person under 21 years of age follows that of the parents or of a legal guardian who has actual custody of such person or administers the property of such person. In the case of divorce or separation, if either parent meets the residence requirements, such person will be considered a resident.²
 - (b) If such person comes from another state or country for the predominant purpose of attending the University, he or she shall not be admitted to resident student status upon the basis of the residence of a guardian in fact, except upon appeal to the Standing Committee on Residence in each case.¹
 - (c) Such person may be classified as a resident student without meeting the 12-month residence requirement within Indiana if his or her presence in Indiana results from the establishment by his or her parents of their residence within the state and if he or she proves that the move was predominantly for reasons other than to enable such person to become entitled to the status of "resident student."¹
 - (d) When it shall appear that the parents of a person properly classified as a "resident student" under subparagraph (c) above have removed their residence from Indiana, such person shall then be reclassified to the status of nonresident; provided, that no such reclassification shall be effective until the beginning of a semester next following such removal.
 - (e) A person once properly classified as a resident student shall be deemed to remain a resident student so long as remaining continuously enrolled in the University until such person's degree shall have been earned, subject to the provisions of subparagraph (d) above.
3. The foreign citizenship of a person shall not be a factor in determining resident student status if such person has legal capacity to remain permanently in the United States.
 4. A person classified as a nonresident student may show that he or she is exempt

¹Rules 2(b) and 2(c) apply only to unemancipated persons under 21 years of age.

²Invocation of the provision in Rule 2(a) that applies to cases of divorce or separation requires appropriate legal documentation.

from paying the nonresident fee by clear and convincing evidence that he or she has been a resident (see Rule 1 above) of Indiana for the 12 months prior to the first scheduled day of classes of the semester in which his or her fee status is to be changed. Such a student will be allowed to present his or her evidence only after the expiration of 12 months from the Residence Qualifying Date, i.e., the date upon which the student commenced the 12-month period for residence. The following factors will be considered relevant in evaluating a requested change in a student's nonresident status and in evaluating whether his or her physical presence in Indiana is for the predominant purpose of attending a college, university, or other institution of higher education. The existence of one or more of these factors will not require a finding of resident student status, nor shall the non-existence of one or more require a finding of nonresident student status. All factors will be considered in combination, and ordinarily resident student status will not result from the doing of acts which are required or routinely done by sojourners in the state or which are merely auxiliary to the fulfillment of educational purposes.

- (a) The residence of a student's parents or guardians.
- (b) The situs of the source of the student's income.
- (c) To whom a student pays his or her taxes, including property taxes.
- (d) The state in which a student's automobile is registered.
- (e) The state issuing the student's driver's license.
- (f) Where the student is registered to vote.
- (g) The marriage of the student to a resident of Indiana.
- (h) Ownership of property in Indiana and outside of Indiana.
- (i) The residence claimed by the student on loan applications, federal income tax returns, and other documents.
- (j) The place of the student's summer employment, attendance at summer school, or vacation.
- (k) The student's future plans including committed place of future employment or future studies.
- (l) Admission to a licensed profession in Indiana.
- (m) Membership in civic, community, and other organizations in Indiana or elsewhere.
- (n) All present and intended future connections or contacts outside of Indiana.

- (o) The facts and documents pertaining to the person's past and existing status as a student.
 - (p) Parents' tax returns and other information, particularly when emancipation is claimed.
5. The fact that a person pays taxes and votes in the state does not in itself establish residence, but will be considered as hereinbefore set forth.
 6. The Registrar or the person fulfilling those duties on each campus shall classify each student as resident or nonresident and may require proof of all relevant facts. The burden of proof is upon the student making a claim to a resident student status.
 7. A Standing Committee on Residence shall be appointed by the President of the University and shall include two students from among such as may be nominated by the student body presidents of one or more of the campuses of the university. If fewer than four are nominated, the President may appoint from among students not nominated.
 8. A student who is not satisfied by the determination of the Registrar has the right to lodge a written appeal with the Standing Committee on Residence within 30 days of receipt of written notice of the Registrar's determination, which Committee shall review the appeal in a fair manner and shall afford to a student a personal hearing upon written request. A student may be represented by counsel at such hearing. The Committee shall report its determination to the student in writing. If no appeal is taken within the time provided herein, the decision of the Registrar shall be final and binding.

The decision of the Committee shall be final and shall be deemed equivalent to a decision of the Trustees of Indiana University.
 10. A student or prospective student who shall knowingly provide false information or shall refuse to provide or shall conceal information for the purpose of improperly achieving resident student status shall be subject to the full range of penalties, including expulsion, provided for by the University, as well as to such other punishment which may be provided for by law.

11. A student who does not pay additional monies which may be due because of his or her classification as a nonresident student within 30 days after demand, shall thereupon be indefinitely suspended.
12. A student or prospective student who fails to request resident student status within a particular semester or session and to pursue a timely appeal (see Rule 8) to the Standing Committee on Residence shall be deemed to have waived any alleged overpayment of fees for that semester or session.
13. If any provision of these Rules or the application thereof to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of these Rules which can be given effect without the invalid provision or application, and to this end the provisions of these Rules are severable.
